

## TROPICAL CYCLONE BULLETIN NO. 8

### Tropical Depression "EMONG"

Issued at 5:00 PM, 5 July 2021

Valid for broadcast until the next bulletin at 8:00 PM today

TROPICAL DEPRESSION "EMONG" ACCELERATES AS IT CONTINUES TO APPROACH BATANES-BABUYAN ISLANDS AREA.						
<b>Location of Center (4:00 PM)</b>						
The center of Tropical Depression "EMONG" was estimated based on all available data at <b>215 km East Northeast of Calayan, Cagayan or 160 km East Southeast of Basco, Batanes(19.9°N, 123.4°E)</b>						
<b>Intensity</b>						
Maximum sustained winds of <b>55 km/h</b> near the center, gustiness of up to <b>70 km/h</b> , and central pressure of <b>1002 hPa</b>						
<b>Present Movement</b>						
<b>Northwestward at 45 km/h</b>						
<b>Extent of Tropical Cyclone Winds</b>			Philippine Atmospheric Geophysical and Astronomical Services Administration			
<b>Strong winds</b> extend outwards up to <b>200 km</b> from the center						
TRACK AND INTENSITY FORECAST						
Date and Time	Center Position			Intensity		Movement dir. and speed (km/h)
	Lat. (°N)	Lon. (°E)	Location	MSW (km/h)	Cat.	
<b>12-Hour Forecast</b> 2:00 AM 6 July 2021	21.5	120.4	170 km West Northwest of Itbayat, Batanes	65	TS	NW 35
<b>24-Hour Forecast</b> 2:00 PM 6 July 2021	23.3	118.2	470 km Northwest of Itbayat, Batanes (OUTSIDE PAR)	45	TD	NW 25
<b>36-Hour Forecast</b> 2:00 AM 7 July 2021	25.5	116.0	795 km Northwest of Itbayat, Batanes or in the vicinity of Ganzhou, Jiangxi, China (OUTSIDE PAR)	-	LOW	NW 30

## TROPICAL CYCLONE BULLETIN NO. 8

### Tropical Depression “EMONG”

Issued at 5:00 PM, 5 July 2021

Valid for broadcast until the next bulletin at 8:00 PM today

TROPICAL CYCLONE WIND SIGNALS IN EFFECT			
TCWS No.	Luzon	Visayas	Mindanao
<b>1</b> (30-60 km/h Strong winds prevailing or expected in 36 hours)	<b>Batanes and the northeastern portion of Cagayan (Santa Ana, Gonzaga) including Babuyan Islands</b>	-	-

HAZARDS AFFECTING LAND AREAS
<p><b>Heavy Rainfall</b></p> <ul style="list-style-type: none"> <li>Today through tomorrow (6 July) morning, “EMONG” is forecast to bring moderate to heavy with at times intense rains over Batanes and Babuyan Islands.</li> <li>Under these conditions and considering antecedent rainfall, isolated to scattered flash flooding and rain-induced landslides are highly likely, especially in areas with high or very high susceptibility to these hazards as identified in hazard maps. Adjacent or nearby areas may also experience flooding in the absence of such rainfall occurrence due to surface runoff or swelling of river channels.</li> </ul> <p><b>Severe Winds</b></p> <p>Areas where Tropical Cyclone Wind Signal (TCWS) #1 is hoisted will be experiencing strong winds (strong breeze to near gale) during the passage of the tropical depression. However, the projected track and intensity suggests the possibility of hoisting TCWS #2 over portions of the localities presently under TCWS #1.</p>
HAZARDS AFFECTING COASTAL WATERS
<p>Under the influence of the tropical depression, rough to very rough seas (2.5 to 5.5 m) will be experienced over the seaboard of areas under TCWS #1 and the remaining seaboard of Cagayan. Sea travel is risky over these waters, especially for those using small seacrafts. Mariners without the proper experience should immediately seek safe harbor.</p>
TRACK AND INTENSITY OUTLOOK
<ul style="list-style-type: none"> <li>The tropical depression is forecast to continue moving generally northwestward as it approaches the Extreme Northern Luzon-Taiwan area. On the forecast track, the center of the tropical depression will pass close or make landfall in the vicinity of Batanes-Babuyan Islands area between 6:00 PM and 10:00 PM tonight. “EMONG” may likely exit the Philippine Area of Responsibility tomorrow early morning and will continue moving northwestward towards Fujian, China.</li> <li>“EMONG” may intensify into a tropical storm within the next 12 hours. After passing south of southern Taiwan, “EMONG” may weaken into a tropical depression due to its interaction with the rugged terrain. It will then weaken into a remnant low as it moves further inland over Jiangxi, China.</li> </ul>

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 8:00 PM today.
